# Big Mike’s Junk Removal

## The 15-Minute Cleanout Reset

A quick prep sheet for a furniture pickup, construction cleanup, or general clutter clearout.

### 1. Make three quick piles

- **Keep:** staying in the house or going back into the room.
- **Go:** ready to be removed.
- **Not sure:** set a short timer and make the best call you can.

### 2. Make the path obvious

- Clear a walkway from the items to the door.
- Note stairs, gates, elevators, narrow halls, or tight corners.
- Move anything fragile that should not be near the work area.

### 3. Photograph the useful details

Take one wide photo of the pile and close-ups of the biggest or heaviest items. Include the access path when it may change the job.

### 4. Set aside anything that needs a special conversation

Do not mix hazardous, sharp, leaking, pressurized, or otherwise questionable materials into the main pile. Ask about anything you are unsure of before pickup.

### 5. Prepare the first message

Include:

- what needs to go;
- roughly how much there is;
- stairs, long carries, curbside access, or other access details;
- when you hope to clear it;
- your town and a photo if helpful.

## 6. Reach out

Call or text **(603) 973-9431** for a quote. This checklist is a preparation tool; the business confirms accepted materials, availability, and the final quote directly.
